

Product Information: **POWER STEERING FLUID**

Description

Power Steering Fluid is blended from highly refined mineral oils and a high performance additive system. The product is designed to meet the operational demands of most steering systems where a fluid meeting General Motors Dexron® IID or IIIH specifications, or similar, are required.

Features

- Helps to eliminate leaks and excessive noise.
- Improves rack and pinion motion and reduces sluggish response.
- Compatible with all system materials.
- Protects system components from wear.
- Can be safely mixed with ATF fluids of this specification.

Application

Always refer to manufacturer's handbook or seek technical advice.

Performance Levels

Based on GM Dexron® IIIH performance characteristics.

Physical Characteristics

Appearance	Red
Density @ 15 °C	0.872
Viscosity @ 100 °C, cSt.	7.1
Viscosity @ 40 °C, cSt.	35.8
Viscosity Index	154
Flash Point (Closed) °C	194
Pour Point, °C	-39
